Why Solar Channel Partners ?

India is projected to reach 280 GW of solar capacity by 2030

- The solar industry is growing rapidly across the world, and India is leading the way in adopting renewable energy resources. Our Prime Minister Narendra Modi has set ambitious targets, including 1 crore residential rooftop solar installations as part of India's clean energy mission.
- With supportive government policies for residential, industrial, and large-scale solar projects, the opportunity to grow a sustainable and profitable solar business has never been better.
- At **Heaven Green Energy Limited**, established in 2017, we have been working closely with the government and the solar industry. Over the last eight years, we have empowered 7000+ households to make their electricity bills zero, helping them save money for their future.

Our Vision is to

- Solarise 1 lakh households.
- Create large-scale employment in the solar industry.

To achieve this, we have developed a robust channel partner model that creates a win-win-win situation for us, our partners, and end consumers.

- Govt Of India is planning to invest 75,000 Crore in Solar residential Sector for 1 crore Rooftop Solar

-PM Narendra Modi
